UNIVERSITY INSTITUTE

Higher Technician

NURSING

ABOUT THE CAREER

Title: Associate's Degree in Nursing

Duration: 2 years

Format: In-person

Schedule: Morning – Afternoon (Weekends)

Mission

To become a leading school in the training of nursing technicians with the knowledge and skills for quality care, disease prevention, and health promotion for people of all age groups. Furthermore, to excel in management, administration, and research in the health field.

Vision

To train autonomous and responsible nursing professionals who meet high standards of practice. This is achieved through the development of skills such as critical thinking, decision-making, therapeutic communication, and patient education, as well as the humanistic and bioethical management of care, focusing on strengthening health and preventing disease at the individual and family levels.

Graduate Profile

For future professional practice in maternal and child health, it is crucial to develop competencies that include the application of technical protocols for healthcare during pregnancy and the postpartum period, as well as the promotion of breastfeeding. Risk factors must be identified, and intervention plans designed to improve lifestyle habits and prevent disease. Furthermore, it is essential to utilize health technologies to optimize clinical procedures, ensure biosafety, and provide comprehensive care at all levels of attention. Training should also include meticulous record-keeping, community work, and educational campaigns that promote healthy practices while respecting the beliefs and traditions of the local population.
