INNOVATION**

ABOUT THE CAREER

Title: Advanced University-Level Technology in Teaching and Educational Innovation

Duration: 3 years

Format: Hybrid

Schedule: Nocturne

Mission

To train professionals in Teaching and Educational Innovation who apply their knowledge to innovate and adapt to changing challenges, committed to cultivating a critical and reflective spirit in our students, providing them with the necessary tools and skills to implement effective teaching strategies that promote meaningful and enriching learning.

Vision

To be a benchmark in the country in the excellence of training university technology professionals in Teaching and Educational Innovation, leading learning processes that allow us to respond to the needs of the 21st century society, as agents of change, capable of transforming inclusive and motivating learning environments that aspire to reach their maximum potential.

Graduate Profile

- Use active methodologies in the teaching and learning process.
- Identify and distinguish the main currents and theories in the field of Sociology of Education.
- Understand the social scenarios, theories, and pedagogical models in order to detect the socio-educational characteristics of the text and the educational context, in accordance with the curriculum's principles.
- Understand the different theoretical and methodological perspectives of Curriculum Design in order to incorporate them into pedagogical work.
- Develop the didactic foundations of the micro-curriculum for classroom-level learning that respond to the needs of students at each level or course.

Advanced University-Level Technology in Teaching and Educational Innovation Curriculum

1st Semester	Oral and Written Expression	Sociology of Education	Research Fundamentals	Psychology of Learning	Office Automation
2nd Semester	Didactics and General Pedagogy	Educational Evaluation	Neuroeducation	Statistics	E-pedagogy
3rd Semester	Andragogy	ActiveTeaching Methodologies	Emotional Education and Soft Skills	Creativity and Innovation	E-PEDAGOGY
4th Semester	Introduction to Criminalistics	Introduction to Criminalistics	Introduction to Criminalistics	Introduction to Criminalistics	Introduction to Criminalistics
5th Semester	Inclusive Education and Special Educational Needs	Educational Legislation	Educational Innovation	Emerging Technologies	Teaching Materials for EVA
6th Semester	Educational Management and Quality	Educational Innovation Projects	Leadership and Innovation	Professional Ethics	TICs Management

Strengths of the Program

1. It provides comprehensive information that combines theory and practice in teaching and educational innovation.
2. It facilitates the creation of a network of contacts with other professionals and organizations in the field of education.
3. It promotes the use of new technologies and innovative methodologies in the teaching-learning process.
4. It trains students in the use of digital tools and technological resources for education.
5. It offers internship opportunities in real educational settings, facilitating the application of theoretical knowledge.
